PRIVATE OFFICE

1 U Shape Desk

2 Boat Conference Table

3 Credenza

4 Lateral Bookcase Combo

CONFERENCE ROOM

1 Boat Conference Table

2 Lectern

3 Valet Cabinet

4 Rectangle Table

SPECIFICATIONS

- At the heart of the Interior Connectors system is 1" square, 16-gauge steel tubing assembled using patented zinc-cast connectors with ABS plastic sleeves. The tubing frame is finished with epoxy powder coat paint.
- A patented panel-molding system holds panel inserts in place. This assembly technique allows for the easy removal and replacement of panel inserts without disturbing wires or cables and without requiring disassembly of the furniture.
- Worksurfaces are 1.25" thick and finished with a high-pressure wear-resistant laminate writing surface with a balancing laminate backer sheet on the underside of the worksurface.
- Workstations can be designed and manufactured to exact dimensions - any length, depth, or height - and our unique connectors allow for nearly endless configurations.
- Tables use fully welded steel legs and are designed with a strong metal-to-metal connection from leg to worksurface with threaded inserts and improved locking technology to ensure durability.
- A broad palette of colors exists for panels, worksurfaces, fabrics and 3MM edges making it easy to maintain a consistent and coordinated look throughout your organization.

THE INTERIOR CONCEPTS PROCESS

LOOK: Browse our product selections to find the design that will work for you. Contact us to start your project, and a sales representative will contact you to discuss your needs and find the best furniture solution.

DESIGN YOUR FURNITURE: After our design experts work with you to define your needs, they will propose and initial furniture solution complete with 2D and 3D drawings. Over a web conference, you will see how the furniture and layout will look in your space. Make live changes and select colors to see a visual of the final design of your furniture solution.

PLACE YOUR ORDER: Once you give the go-ahead on your design, the plans go directly to the factory floor and into production. After production, the furniture will ship to you, and our professional installers will assemble it on-site. Throughout each step, we work with you to answer questions making sure the furniture arrives when needed.

AFTER THE INSTALLATION: Your furniture will require little maintenance since our system does not have end caps or loose pieces. Should you need it, your furniture is backed by a limited lifetime warranty. Plus, we keep a record of your order on file so reconfigurations and additions are a breeze.

NOTES

Limited Lifetime Warranty

Products are backed by a limited lifetime warranty.
