solutions that fit.

Esports: A Growing Opportunity in Education

Gaming consoles and computers are second nature to today's generation of learners. As a result, electronic sports (esports) are rapidly gaining popularity as educational tools in K-12 schools and at the collegiate level.

Nationwide, schools recognize the significant role scholastic esports play in developing students' creativity, problem-solving and decision-making skills, and leadership abilities. Esports provides a welcoming community that is inclusive and accessible to all students regardless of background, abilities, or financial situation.

"I believe esports will rival the biggest traditional sports leagues in terms of future opportunities."

–Steve Borenstein, Chairman of Activision Blizzard's Esports Division / Former CEO of ESPN and NFL Network

Scholastic esports programs come in all shapes and sizes. Some are built into the curriculum while others are after school clubs. Whatever style they may be, it is critical to have comfortable and accommodating furniture to maximize the student experience in their environment. This is where Interior Concepts can help.

School districts benefit when they recognize the versatility of gaming labs. When state of the art equipment and the perfect Interior Concepts furniture solution are brought together, these spaces can be used for other purposes like photography studios, video editing labs, and computer based learning programs.

Esports offers a unique, exciting way to reach young individuals and unlock their potential. Interior Concepts specializes in custom gaming labs, furniture and storage. We work hand in hand with educators to help make their vision for their students possible.

Games like *League of Legends*, *Fortnite*, and *Overwatch* are taking their place among popular sports like basketball, football, and hockey. Colleges and universities having a strong esports program could be a big draw for prospective students.

- Edmarket (Allison Tardif)

“The look of astonishment on our esports team as they entered the facility for the first time was amazing” conveyed Shawn Canady. “They couldn’t believe that it was for them. Truly amazing in only 875 square feet of space.” – Lebanon High School

Through grants that put esports programs in schools, students gain access to technology that otherwise they would not have. Just having this exposure can open a pathway for many students into the exciting world of technology related careers. The esports environment plays a huge role in creating a successful program and with every school having unique specifications, our expert design team is ready to assist!

Recently, Interior Concepts completed two gaming labs; each of which had different requirements in creating their esports programs. Together, we created two beautiful yet different spaces that will benefit the schools and students for years to come.

Integrate a variety of ergonomic accessories for tables or stations to create a comfortable environment. Sit to stand worksurfaces, monitor arms and easily accessible power will increase the effectiveness of the furniture for the user.

2

- 1 Cords and integrated power are easily concealed behind sliding doors in our Chase Wire Management System.
- 2 Custom worksurfaces were designed to match the curve of the tiered levels in this gaming lab.
- 3 Our vertical chase simplifies accessing power from the ceiling when stations have limited power access in the room.

For gaming and all of your furniture needs

SPECIFICATIONS

- At the heart of the Interior Concepts system is 1" square, 16-gauge steel tubing assembled using patented zinc-cast connectors with ABS plastic sleeves. The tubing frame is finished with epoxy powder coat paint.
- A patented panel-molding system holds panel inserts in place. This assembly technique allows for the easy removal and replacement of panel inserts without disturbing wires or cables and without requiring disassembly of the furniture.
- Worksurfaces are 1.25" thick and finished with a high-pressure wear-resistant laminate writing surface with a balancing laminate backer sheet on the underside of the worksurface.
- Workstations can be designed and manufactured to exact dimensions - any length, depth, or height - and our unique connectors allow for nearly endless configurations.
- Tables use fully welded steel legs and are designed with a strong metal-to-metal connection from leg to worksurface with threaded inserts and improved locking technology to ensure durability
- A broad palette of colors exists for panels, worksurfaces, fabrics and 3MM edges making it easy to maintain a consistent and coordinated look throughout your organization

THE INTERIOR CONCEPTS PROCESS

LOOK: Browse our product selections to find the design that will work for you. Contact us to start your project, and a sales representative will contact you to discuss your needs and find the best furniture solution.

DESIGN YOUR FURNITURE: After our design experts work with you to define your needs, they will propose an initial furniture solution complete with 2D and 3D drawings. Over a web conference, you will see how the furniture and layout will look in your space. Make live changes and select colors to see a visual of the final design of your furniture solution.

PLACE YOUR ORDER: Once you give the go-ahead on your design, the plans go directly to the factory floor and into production. After production, the furniture will ship to you, and our professional installers will assemble it on-site. Throughout each step, we work with you to answer questions making sure the furniture arrives when needed.

AFTER THE INSTALLATION: Your furniture will require little maintenance since our system does not have end caps or loose pieces. Should you need it, your furniture is backed by a limited lifetime warranty. Plus, we keep a record of your order on file so reconfigurations and additions are a breeze.

Limited Lifetime Warranty
