

# LEARNING ENVIRONMENTS

Solutions for Students, Teachers, and Staff

Interior Concepts®

solutions that fit.

## WE ARE YOUR BEST STUDENT

Ask us a question and we will provide thoughtful answers. Put us on a team and we will work with all members. Give us homework and we will finish it. Bring us a problem and we will deliver solutions. At Interior Concepts, it's what we do.

For more than 25 years, Interior Concepts has partnered with schools — listening and working to design learning environments that fit the needs of teachers, staff, and students of all ages. Like your most seasoned teachers, we have seen and heard it all. Old building quirks? Check. Flexibility for STEAM classrooms? Check. Secured storage for records? Check. We have solutions for everyone — from kids learning their ABCs to college & CTE courses.

We are ready to share our expertise and outside-the-box thinking with you to deliver made-to-order turnkey furniture solutions that are durable, attractive, functional, adaptable, and an exceptional investment of district funds. And with furniture built to the inch, and a wide variety of table shapes and options, you can test our ability to create learning and work spaces while enjoying the best furniture-purchasing experience in the industry.

---

We've been hitting the books for years in order to ace the challenge of making your job easier and your spaces better. We do whatever it takes to make sure your project goes as smoothly as possible — even if the design process starts with a sketch on a napkin. Like preparing for final exams, our design specialists will listen closely in order to understand the project's needs and challenges.

After developing a general layout, we then conduct an online design session with you. Furniture designs are refined and changed in real time — allowing each environment to become an effective and engaging solution tailored to its unique demands. Your furniture is then made in the USA, delivered and assembled by our professional installers, and backed by a limited lifetime warranty. We stand by our people and our products, and know that we will have earned an A+ for our final grade.

# solutions that fit.

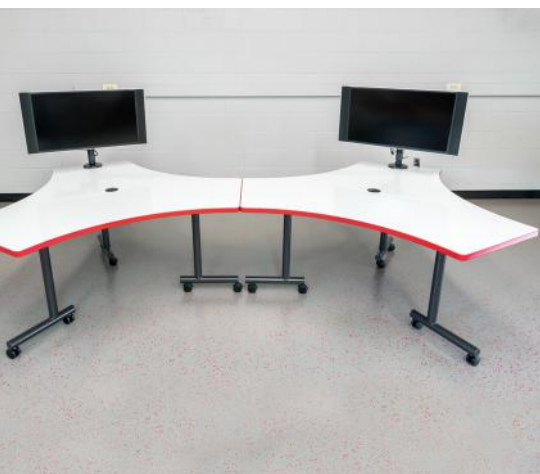

# STEAM ENVIRONMENTS

**Ready for bytes, bots, and brushes.** You never know what activity might be going on in a STEAM classroom from day to day, which is why multipurpose furniture with mobility is imperative for teachers and students. Furniture needs to accommodate presentations, facilitate individual and team collaboration, provide technology workstations, and withstand hard use for years to come.

## Successful STEAM classrooms share these traits:

- Hands-on learning area
- Designated space for computers and equipment
- Ample storage
- Mobile and reconfigurable furniture that adapts to lessons and activities

# MEDIA CENTER AND LEARNING COMMONS

**A little bit of this. A little bit of that. A lot of potential.** Traditional libraries at all levels of education have been given makeovers into multipurpose rooms where students socialize, work independently, read, research and create. Transform these areas to support small groups or host a full classroom for a day. These rooms, regardless of name, have this in common — they are where information, technology, and traditional resources collide. They are textbook examples of “multipurpose”, meeting all the demands of students and teachers with both flexible and task-specific furniture used throughout the space.

# CAREER AND TECHNICAL EDUCATION

**Specific answers to a wide range of needs.** With ever changing technology in K-12 schools and beyond, there are countless fields of study beyond traditional courses. Fields like animation, 3D printing, drafting, graphic design, programming, and broadcasting frequently require furniture capable of handling unique conditions. Each subject often has a different “must-have” feature — lab carts, news desks, drafting tables, or simply a workstation capable of holding all the tools needed for the job. This variability is not a trick question to Interior Concepts, since we tailor each furniture solution to the needs at hand. We are here to answer every question, including the extra credit ones.

CTE

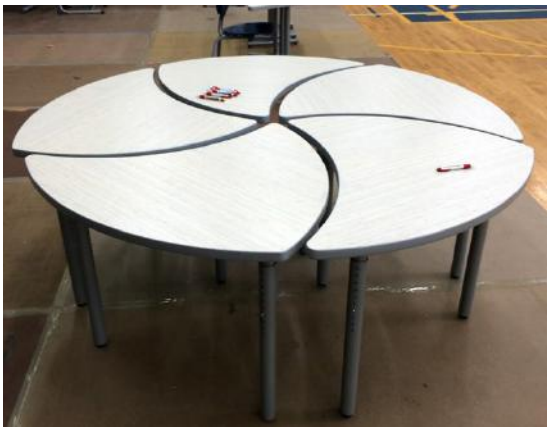

# CLASSROOMS AND TABLES

**Tables — designed around you.** Trends come and go, but one thing never goes out of style: listening to what customers truly need. Educational environments are always evolving and need to be adaptable even down to the day's needs. Our tables accommodate a variety of applications and can be effortlessly reconfigured for even the most challenging floor plans. Choose from a variety of shapes, heights, and features including power, adjustable height, or flip-top. Best of all, they are durable and will last for years to come.

See our Tables brochure for a complete overview of each table line and accessories available.

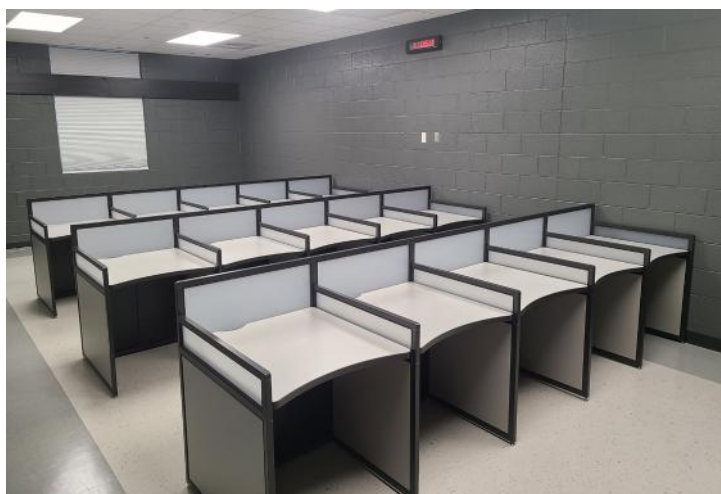

# COMPUTER LABS

**Click. Point. Learn.** The role of computers in classrooms has evolved from basic keyboarding to technology-driven curriculum. Day to day, classes such as industrial design, animation, engineering, and esports employ robust software packages necessary for learning. These technology-rich computer labs require workstations to comfortably accommodate students and their equipment. Workstation dimensions are built to the inch allowing for varying levels of privacy or collaboration.

IT departments appreciate the Chase™ Wire Management System with its ability to help simplify equipment connections. Cables and wires are kept out of sight behind sliding doors and optional built in power makes powering runs of stations a breeze.

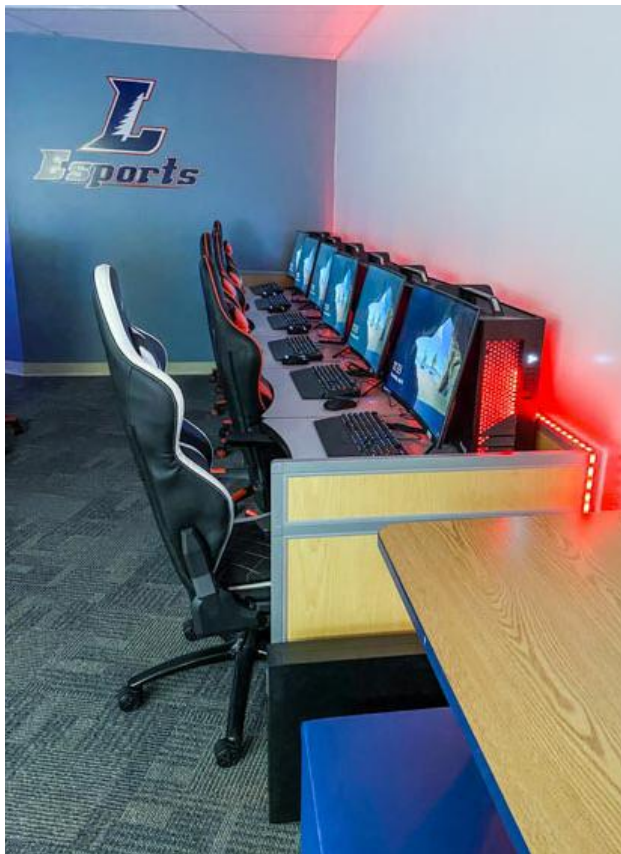

## ESPORTS

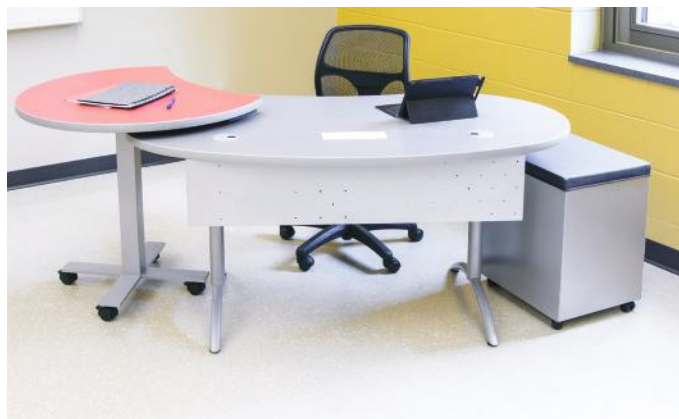

**Game on!** School districts nationwide recognize the role esports play in developing students' communication, problem solving and decision making skills. Interior Concepts specializes in custom gaming labs, furniture, and storage along with a wide array of accessories and additional options.

# INSTRUCTOR DESKS AND PLANNING STATIONS

**Places to land and places to plan.** As teaching methods have evolved beyond the standard classroom with students in desks and teachers lecturing, so has educational furniture in order to incorporate group learning, flexible classrooms, and increased teacher/student interaction. These stations range from fixed panel based stations to tables paired with an adjustable height podium. Let teachers gather in separate planning rooms to collaborate and discuss lesson plans with our planning stations design specifically for their needs. Instructor furniture that satisfies varied styles and teaching approaches will be designed hand-in-hand with us to ensure that your instructors receive exactly what works best for their environments.

# ADMINISTRATIVE AND RECEPTION

**Smart designs for front and back offices.** From smiling faces that greet visitors to the IT department keeping the entire district humming, furniture for administrative staff encompass a wide variety of needs. Sports coaches can plan game strategies in one large room, but guidance counselors discuss futures in private offices. Payroll departments require locking storage for records and principals want seating for meetings with students or staff. There may not be a one-size fits all furniture solution, but with our wide variety of desktops, storage components, finishes, and ergonomic accessories, we can provide staff with the right furniture and work tools that facilitate day-to-day productivity and increase job satisfaction. Our smart and tailored to the inch approach earns gold stars wherever we go.

See our Office Furniture brochure for a complete overview of products and accessories available.

# SPECIFICATIONS

- At the heart of the Interior Concepts system is 1" square, 16-gauge steel tubing assembled using patented zinc-cast connectors with ABS plastic sleeves. The tubing frame is finished with epoxy powder coat paint.
- A patented panel-molding system holds panel inserts in place. This assembly technique allows for the easy removal and replacement of panel inserts without disturbing wires or cables and without requiring disassembly of the furniture.
- Worksurfaces are 1.25" thick and finished with a high-pressure wear-resistant laminate writing surface with a balancing laminate backer sheet on the underside of the worksurface.
- Workstations can be designed and manufactured to exact dimensions - any length, depth, or height - and our unique connectors allow for nearly endless configurations.
- Tables use fully welded steel legs and are designed with a strong metal-to-metal connection from leg to worksurface with threaded inserts and improved locking technology to ensure durability
- A broad palette of colors exists for panels, worksurfaces, fabrics and 3MM edges making it easy to maintain a consistent and coordinated look throughout your organization

## THE INTERIOR CONCEPTS PROCESS

**LOOK:** Browse our product selections to find the design that will work for you. Contact us to start your project, and a sales representative will contact you to discuss your needs and find the best furniture solution.

**DESIGN YOUR FURNITURE:** After our design experts work with you to define your needs, they will propose and initial furniture solution complete with 2D and 3D drawings. Over a web conference, you will see how the furniture and layout will look in your space. Make live changes and select colors to see a visual of the final design of your furniture solution.

**PLACE YOUR ORDER:** Once you give the go-ahead on your design, the plans go directly to the factory floor and into production. After production, the furniture will ship to you, and our professional installers will assemble it on-site. Throughout each step, we work with you to answer questions making sure the furniture arrives when needed.

**AFTER THE INSTALLATION:** Your furniture will require little maintenance since our system does not have end caps or loose pieces. Should you need it, your furniture is backed by a limited lifetime warranty. Plus, we keep a record of your order on file so reconfigurations and additions are a breeze.

### Limited Lifetime Warranty

Products are backed by a limited lifetime warranty.
