

COMPUTER STATIONS

The role of computers in classrooms has evolved from basic keyboarding to technology-driven curriculum. Day to day, classes such as Industrial Design, Animation, Engineering, and Esports employ robust software packages necessary for learning. These technology rich computer labs require workstations to comfortably accommodate students and their equipment. Workstation dimensions are built to the inch allowing for varying levels of privacy or collaboration

IT departments appreciate the Chase™ Wire Management System with its ability to help simplify equipment connections. Cables and wire are kept out of sight behind sliding doors and optional built in power makes powering runs of stations a breeze.

FEATURES

- 1.25" thick worksurface with HPL laminate, balancing-backer sheet, and 3MM edge
- Built-in Chase™ Wire Management
- Limited lifetime warranty
- Made in the USA
- MAS® Certified Green

OPTIONS

- Station dimensions/worksurface heights are customizable by the inch
- 8-Wire electrical and desktop power
- CPU brackets, monitor arms, and keyboard trays
- Numerous color options

There are many ways to configure your room; choose a more traditional layout or create something totally your own!
